BelaySAFE Calibration Log

Operators should maintain a systematic record of BelaySAFE calibrations. This sample log captures essential details such as calibration date, device serial number, rope type, friction setting, and any pertinent remarks. Such documentation is critical for monitoring device performance and identifying trends that may necessitate intervention.

Device: _____ Facility Name: _____

Serial #: _____ Facility Location: _____

Purchase Date: _____ Deployment Date: _____

Calibration Date	Performed By	Friction Setting	Rope Brand/Model	New Rope Y/N	Remarks
